

Melamine SPC flooring

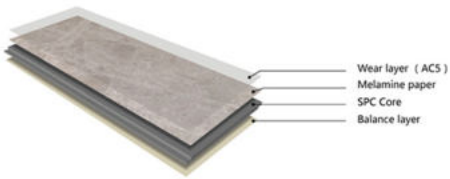

The Most Anti-Scratch SPC Flooring

MSPC flooring is an innovative new SPC Flooring. Its structure is wear-resistant paper+decorative paper+SPC rigid core+balance paper, formed by cold pressing. MSPC flooring inheriting performance of wear-resistant & scratch-resistant, more clear patterns, and various colors. Its high glossy surface shows a classic beauty. MSPC is much more anti-scratch than traditional laminate flooring: Firstly, Anti-scratch and Wear-resistant are totally different properties. Briefly speaking, by anti-scratch, we mean its ability to resist unrecoverable scratches. Wear-resistant refers to its wear layer performance. The thicker wear layer floor has, the more wear-resistant.

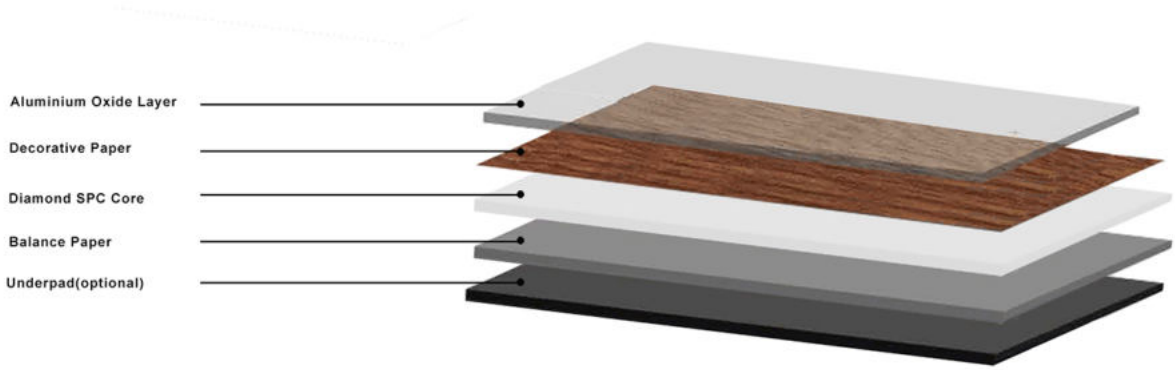

- High wear resistance
- Scratch resistant
- waterproof
- Not easy to warp
- Stunning wood-look visuals
- Stereoscopic

Structure

Advantage & Disadvantage

	Waterproof	Anti Scratch	Wear resistant	Anti-slip	Formaldehyde	Fire resistance	Eco-friendly	Performance
